

# What's in my lawn?

If you don't use weedkiller on your lawn and don't cut it too short a wonderful variety of wildflowers will appear without any help. You may already have some in your lawn. Can you find any of these? Even if they are not in flower, you can identify them by looking carefully at the shape of the leaves. If you have not got a lawn, you could search your local park or other safe, grassy area.

Lesser Celandine

Clover

Mouse-ear Chickweed

Self-heal

Creeping buttercup

Daisy

Dandelion

Black Medick

Yarrow

Field Speedwell
